East Face
 Saleable Area 1200 sq.ft (111.48 sq.m)
 Carpet Area 840.08 sq.ft (78.05 sq.m)

OUR TECHNOLOGY.....

We build with German Formwork & Precast Technology
So you get 3% More Carpet Area!

Conventional Point-Load Structures

The walls occupy 12% of the house
9" external Brick walls & 6" internal
Brick walls plus pillars & beams

Our Uniform-Load Structures

The walls occupy only 9% of the house
6" external Shear walls & 4" internal
Shear walls no pillars or beams

Here's How We Build Without Pillars...

1 Reinforced Concrete Shear Walls

The entire structure is built of Reinforced Concrete Shear Wall, which mean every wall is as Strong and Enduring as a Pillar

3 Zero Protrusions

Hence, there would be no pillar & beam protrusions which means more space in the room & 3% more carpet area

2 Uniform Transfer of Load

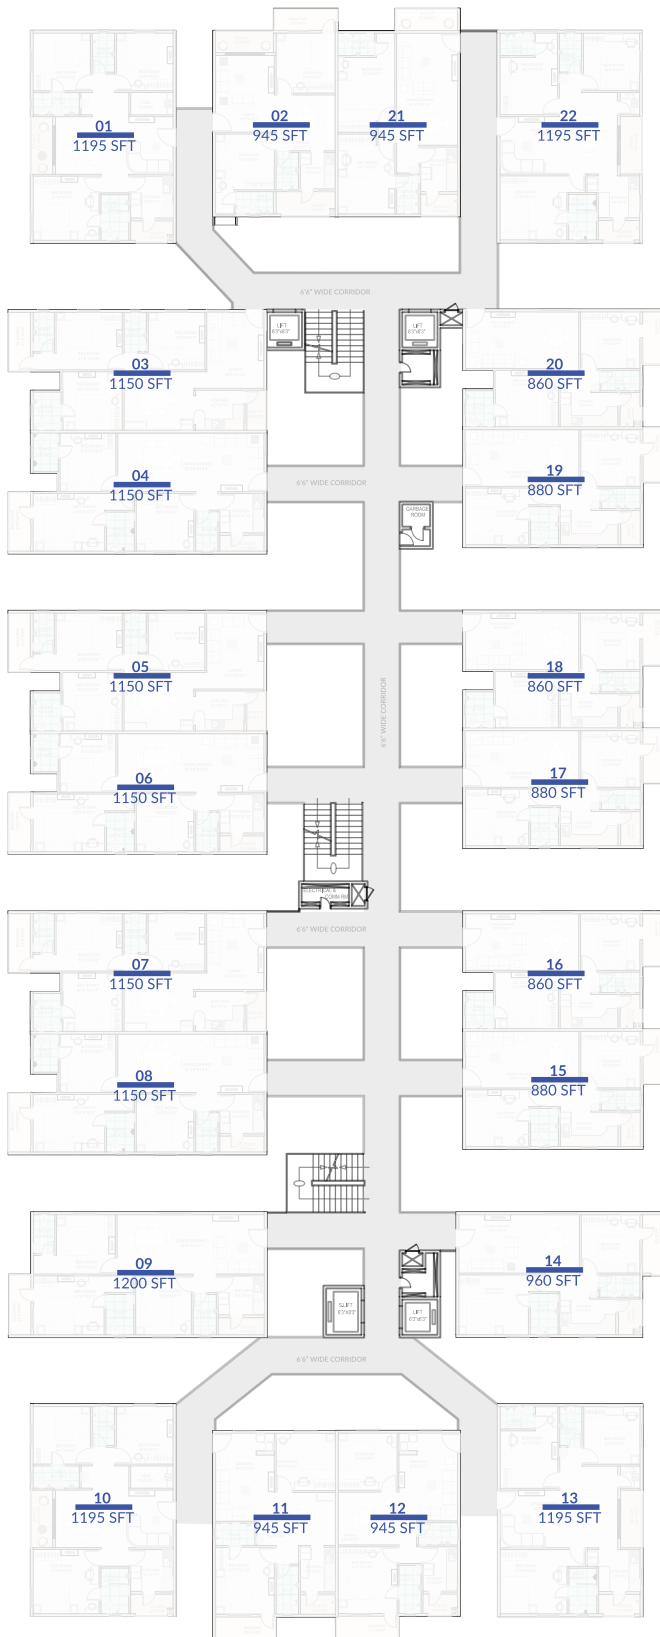

The Shear walls act as the pillars and beams of the structure, Thus the load get transferred uniformly from the Slab to the Shear Walls

4 3% More Space for Carpet Area

For Every 1000sft Build-Up House You Get 30sft More Carpet Area!

Visit www.janapriya.com/technology to learn more about our technology

SMART LAYOUT BLOCK F

Attention To Detail To Save Your Money.

Light Well

Our consciously widened Light well go all the way through to the ground floor to ensure natural light and ventilation, which reduces the cost of maintenance by 35%

.....

Ergonomic

We lay special emphasis planning a utilitarian & ergonomic living space even in the smallest of homes, considering your day-to-day interaction with the essentials at home.

.....

Common Areas

We make sure that the common areas are well planned to minimize any wastage of space or your money.

.....

Maximized Space

We make certain that the balconies are sized aptly to maximize the space in your actual living area, where you need it more.
